# Updated: Phase 2 EER | CS 6400 - Summer 2024 | Team 025

Notes on Updated EER Phase 2 Revisions

Updates included change to the following entities:
Holiday, Discount, Audit, User and District.
Changed Audit entity to a weak entity type with views relationship as an identifying relationship.
Changed the relationships for User and District entities to be mandatory relationships.
Added a business day entity and made it a superclass of the Holiday entity. Connected the newly subclass Holiday entity to the Discount entity as they are related by "Applies".
